Make school drop-off a breeze!

Commuter Connect, a service of CIRTA, offers a **FREE ride-matching service (School Pool)** tailored for assisting parents transporting their children to school.

Whether you manage the transportation for one school or a school district, Commuter Connects' School Pool Program offers cost effective, secure tools to assist in easing stress for parents, reducing traffic congestion and improving air quality.

HOW IT WORKS:

Each school announces the School Pool program to all parents and guardians of registered students. Details of the program are shared including how it functions and the benefits to families and the community. Each student is automatically enrolled in the program unless the parent or guardian notifies the school that they do not want to participate. Then the school provides a list of all the students to Commuter Connect EXCEPT those that have chosen not to participate. Commuter Connect then processes the data and uploads the information into the School Pool database. Once finalized, a match list is generated for each family.

The match list can be delivered to the school as a PDF file that can be printed and delivered to the parents or each parent can have a personal login where they can manage their child's information and receive updated match lists.
